CERTIFIED MAIL R.R.R.

Dear Permittee:

As you know, the special use permit for your recreation residence in Mineral King expires December 31, 1976. The reason for establishing this expiration date was to provide for removal of your cabin to make way for public recreation development at Mineral King. All Mineral King permittees have been informed throughout the years of the planned development of this area for year-round public use and the impact it will have on the summer home lots. However, there is litigation pending and the starting date of development is uncertain. If the litigation is still unresolved as of December 31, 1976, we will offer you a temporary permit authorizing your cabin to remain on the National Forest after the expiration date. This permit would expire 30 days after the issuance of development permits for Mineral King as a year-round public recreational facility or on December 31, 1978, whichever comes first. The annual fee would remain the same as it is now. Please let us know by August 1, 1976 if you wish to accept this offer to remain beyond December 31, 1976, under the foregoing temporary permit arrangement.

Sincerely,

Robert N. Werner
